⚠ No approved estimate found for this project. Please approve an estimate first to generate the project document.

Estimate Management

No pending estimates for this project.

1. Approval Logic & State Persistence Errors

- **Approval Ghosting:** Quotes approved via the UI are not transitioning to a "Completed" or "Approved" state. They remain visible in the **Pending** session even after approval actions are taken.
- **Broken Redirects:** The "Success" links generated immediately after a project is approved lead to broken or non-functional pages (404/Null).
- **Logical Flow Block:** The system fails to recognize existing approvals, resulting in a persistent "**No Approved Estimate**" error message across the project dashboard.
- **Two specific n8n quotes** with written email automation is not approving and showing any pricing .

2. Missing Admin Controls

- **Missing Rejection Functionality:** The Admin interface currently lacks a "Decline" or "Reject" option for quotes. Admins are forced to either approve (which is failing) or leave the quote in the pending queue indefinitely.
- **Manual Override Failure:** There is no simple project section or field currently accepting updated project details manually.

3. Data Mapping & Attachment Issues (n8n Sync)

- **PDF Asset Disappearance:** The PDF documentation provided by the client during the intake phase is not being mapped to the **admin View**.
- **Session Data Loss:** In the second session view, the PDF download option is completely missing, leaving developers with no access to the original project specifications.
- **Workflow Desync:** Approved quotes and associated project flows are not appearing in the "Approved Quotes" or "Active Projects" sections, suggesting a breakdown in the database relationship between the two tables.
